

Anton Glieder, is Prof at the Institute of Molecular Biotechnology at Graz University of Technology (TU Graz), Austria, is Founder, CEO & CSO of bisy GmbH, a privately owned biotechnology company established in 2014. He is an expert in molecular biotechnology, protein and enzyme engineering, synthetic biology, and microbial expression systems, particularly Komagataella phaffii. His research focuses on developing advanced microbial production platforms for the engineering and production of industrial enzymes and other proteins for food, feed, pharma and cosmetics, bridging academic research and commercial biotechnology applications. He cofounded the Austrian Centre of Industrial Biotechnology (ACIB) where he served as Scientific Director and CEO from 2009 to 2014. His scientific publication and patent record demonstrates substantial experience in translating biotechnology innovations into industrial applications and new products.
