

Philip Romero is an associate professor of Biomedical Engineering at Duke University. Dr. Romero pursued graduate studies in Frances Arnold's lab at Caltech and was a postdoctoral researcher in Adam Abate's lab at UCSF. He is the recipient of the Damon Runyon-Rachleff Innovation Award, the Shaw Scientist Award, and the Wisconsin Alumni Research Foundation (WARF) Innovation Award. His research group at Duke focuses on data-driven approaches to model and design biological systems.
